

ENERGY POLICY

The company Extral Sp. z o.o. carries out activities in the design and production of aluminum profiles and fabrication. Our goal is to achieve customer satisfaction and maintain an appropriate level of quality in terms of services rendered and care for the environment and employee safety.

The energy policy established as part of the Integrated Management System is part of the company's long-term strategy to maximize energy efficiency and reduce its negative impact on the environment.

Extral Sp. z o.o. achieves assumed energy and environmental goals through:

- cooperation with suppliers who ensure the reliability, solidarity and energy efficiency of their products and services
- ensuring the availability of information on the achieved energy result, quality, environmental and energy goals within the organization
- providing resources and means necessary to achieve the assumed goals, sustainable use of resources and systematic improvement of environmental load parameters caused by production activities
- directing safe pro-environmental and pro-efficiency attitudes and behavior of employees by constantly improving their qualifications and their participation in and commitment to environmental protection, continuous improvement of the energy result and customer satisfaction
- inclusion in the implementation of the requirements of the Integrated Management System of all employees in accordance with their obligations, competences and responsibility
- continuous improvement of operations in relation to the environment, energy performance, employee safety and customer satisfaction
- supporting procurement and design processes taking into account energy efficiency aspects.
