ENERGY POLICY

The company Extral Sp. z o.o. operates in the field of: production of aluminium billets, design and production of aluminium profiles and fabrication. Our goal is to achieve customer satisfaction and maintain an appropriate level of quality in the scope of services provided, as well as care for the natural environment and employee safety.

The energy policy established under the Integrated Management System is in line with the company's long-term strategy to maximize the efficiency of energy use and reduce the negative impact on the natural environment.

Extral Sp. z o.o. achieves the assumed energy and environmental goals through:

- cooperation with suppliers who ensure reliability, solidarity and energy efficiency of their products and services
- ensuring the availability of information on the achieved energy result, quality, environmental and energy goals within the organization,
- providing resources and means necessary to achieve the assumed goals, sustainable use of resources and systematic improvement of the parameters of environmental burden caused by production activities,
- managing safe pro-environmental and pro-efficiency attitudes and behaviours of employees through the constant improvement of their qualifications and their participation and involvement in activities for the protection of the natural environment, continuous improvement of the energy result and customer satisfaction,
- inclusion in the implementation of the requirements of the Integrated Management System of all employees in accordance with their duties, competences and responsibilities,
- continuous improvement and improvement of activities with regard to the environment, energy performance, employee safety and customer satisfaction
- supporting purchasing and design processes that take into account energy efficiency aspects.
